

NEW X3 FABRIC WRAPPED BELTS

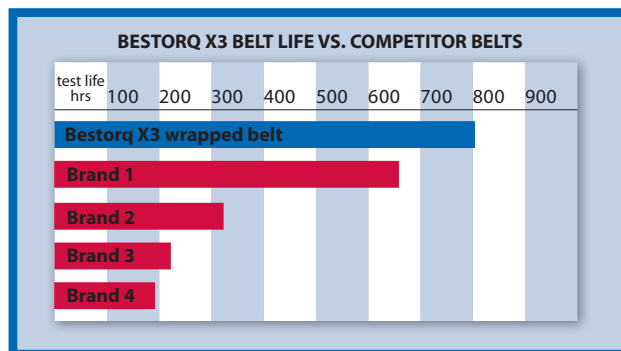

low maintenance belts with high load capacity

Our X3 belts bring in a new generation of wrapped V-Belt performance. They are specially designed to be low maintenance, and are proven to be extra durable for belt life that will outlast the competition. Cutting down maintenance and keeping your machines running at full capacity means you save time and money.

- Durable belts designed to carry a high load capacity results in **cost & space savings**
- X3 belts **match to tighter tolerances** than ARPM standards and ISO standards for confidence in running maximum loads
- Meet all ARPM for heat & oil resistance, and are Static Conducting to ARPM, Mine Safety Standards and ISO 1813
- They are created to be **low maintenance** requiring no rechecks or re-tensioning

Save space, time and money

Our X3 belts are created to carry a high load capacity. Extensive durability testing, certified by a major USA University Department of Mechanical Engineering, shows belt life that continues to out perform the competition. The X3 belts can carry a high capacity so that you can often use fewer belts on a drive resulting in space and cost savings, and reduction in axial and bearing loads. Additionally, the X3 A/4L and B/5L belts are dual branded. They have the flexibility of FHP 4L and 5L belts combined with the high power capacity of A and B section belts.

Low maintenance and easy to install

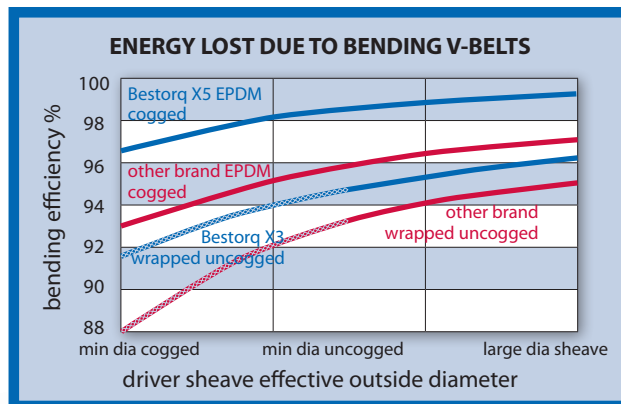

X3 belts are amazingly uniform and smooth running. With excellent adhesion between components and low stretch tensile cords, they have very low elongation making them ultra low maintenance and will not require any rechecks or re-tensioning if installed at the correct recommended tension. Also, the Best in Class fabric wrap design creates the lowest wear belt in the industry.

Energy Savings

Due to superior chemistry and optimized belt design, the X3 belts lose less energy due to bending than any competitor wrapped uncogged belts.

Ready to order

The X3 belts are made from new materials and new molds. They will NOT match former Bestorq Belts. New X3 energy savings belts are ready to order in the following belt profiles: 3L, 4L, 5L, A, B, C, D, 3V, 5V, 8V, SPZ, SPA, SPB, SPC, AA, BB, CC, B-C-D banded, and 3V-5V-8V-SPB-SPC banded.
