

24" x 8" x 11-1/2 99.99% Aerostar® Standard Capacity Gasketed Box Style HP HEPA Filter

Product ID 45112 |  Made in the USA

The Aerostar® HEPA filter is constructed with an 18 gauge galvanized steel frame with a continuous band of media pleated back and forth over corrugated aluminum separators. The HEPA filter removes a broad range of airborne contaminants, including fine dust, smoke, soot, pollen and radioactive particles.

- Available in 95% DOP to 99.999% MPPS
- Standard and High Capacity styles available
- Proprietary automated computer test CIPAT (Computer Integrated Particulate Air Test)
- Galvanized steel frame is standard; other materials and headers are optional
- 100% relative humidity
